The numerous letters which appeared in *The Times* and *Standard*, together with the more elaborate arguments brought forward in the columns of several scientific journals, attracted the attention of my esteemed friend and teacher, Baron von Liebig. A very interesting correspondence ensued, discussing minutely the various questions at issue. Among other valuable results, I may incidentally mention the final repudiation by Liebig of the untenable assumption that his own extractum carnis was of a food value bearing any close relation to the nutriment contained in the whole bulk of meat from which it had been extracted.
