

Mechanisms of Stimulus-Response Coupling in Platelets

Filesize: 7.62 MB

Reviews

An extremely wonderful pdf with lucid and perfect explanations. I could possibly comprehend every little thing out of this created e pdf. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Janie Wilkinson)

MECHANISMS OF STIMULUS-RESPONSE COUPLING IN PLATELETS

To read **Mechanisms of Stimulus-Response Coupling in Platelets** PDF, remember to click the web link beneath and download the ebook or have accessibility to other information which are in conjunction with **MECHANISMS OF STIMULUS-RESPONSE COUPLING IN PLATELETS** book.

Book Condition: New. Publisher/Verlag: Springer, Berlin | Since its inception the research area of platelet pharmacology has always been a vigorous one and it is a characteristic that new approaches to the understanding of platelet function are rapidly and thoroughly investigated. The intensity of this activity is attributable, probably, to an appreciation by research workers in the field that a satisfactory therapeutic control of platelet function has yet to be realized. Also that if and when this problem of controlling platelet function is achieved the benefits to clinical medicine will be immense since platelets are known to be involved in a multiplicity of events coupled within the haemostatic mechanisms and inflammatory responses. Aberrations in the behaviour of platelets is part of the aetiology of atherosclerosis, myocardial and cerebral infarction and thrombosis. At this point in time, research in platelet function is in a particularly rapid state of flux. The recent findings of research workers active in the field and also workers investigating mechanisms of stimulus response coupling in other cells, have provided interesting insights into the generality of mechanisms involved in the function of responsive cells. One may itemize these developments as the area of cell receptor/ligand interaction, induction of cellular response by protein phosphorylation and calcium flux. The mechanism of these latter events occurs through the activity of phospholipase generating transient intermediates. These intermediates may act as ionophores or enzyme activators or may, in the case of eicosanoids, reinforce and make irreversible the cellular response. | Platelet Receptors.- Structure and Organisation of Platelet Membranes.- Platelet Receptors for Thrombin.- Characterisation of ADP Receptors.- Fibrinogen and Platelet Function.- Characterisation of Factor VIII Receptors.- Characterization of Thromboxane Receptors in Human Platelets.- Specific Binding of [3H]-1-O-Octadecyl PAF-Acether to Washed Human Platelets.- Characterisation of Human Platelet...
